UD Carbon Fiber Fabric / CFRP Wrap

Quotation Checklist for Export B2B Buyers

ZD Carbon Fiber

www.zdcarbonfiber.com

Product Scope

Use this checklist for UD carbon fiber fabric, unidirectional carbon fiber wrap, CFRP fabric and carbon fiber reinforced polymer wrap inquiries.

Typical Civil and Industrial Use

- Structural reinforcement for beams, slabs, columns, walls and pipes
- Building repair and civil composite strengthening systems
- Industrial composite panels and laminate production
- Marine repair, automotive composite parts and sports equipment
- Tooling, molds, fixtures and general composite manufacturing

Documents Available

- Technical datasheet for the confirmed material grade
- COA, MSDS, sample or test report available upon request
- Packing information and shipping details before order confirmation

Buyer Message Template

Please quote UD carbon fiber fabric / CFRP wrap with GSM: __, width: __, roll length: __, fiber grade: __, resin compatibility: __, quantity: __, application: __, destination port/country: __, required documents: __.

Specification Information to Provide

Item	What Buyer Should Provide	Common Example
Material type	UD carbon fiber fabric, CFRP wrap or reinforcement fabric	UD fabric / unidirectional wrap
Areal weight	Target GSM or project specification	300gsm, 600gsm or specified GSM
Fiber grade	Required grade or accepted equivalent for review	T300, T700 or confirmed equivalent
Fiber direction	Confirm unidirectional or compare with woven/bidirectional fabric	UD, woven or bidirectional
Width / roll length	Required roll width and roll length for handling and installation	100mm to 1000mm width; roll length by order
Resin system	Compatible resin or application method if already specified	Epoxy resin system, wet lay-up or project system
Quantity	Total rolls, square meters or estimated project area	Roll quantity or square meter quantity
Packing	Export packing or labeling requirement	Carton, pallet or customized packing
Destination	Country, port and preferred delivery terms	Destination country / port / delivery terms
Documents	Whether TDS, COA, MSDS, sample or test report is needed	TDS, COA, MSDS, sample request

Supplier Note

This guide helps prepare complete quotation information. Final material selection, layer count and installation design should be confirmed by the project engineer, contractor or applicable project specification.

Inquiry CTA

Send your material type, GSM, width, roll length, resin system, quantity, application, destination country and document needs. We will review quotation, packing details and available technical documents.
